Misspelled keywords are overlooked when it comes to making money online, which is good news for you because I am about to show you exactly how to turn those misspelt keywords into hard cash.

Let's face it we're not great spellers in this techno era we live in today, we have become lazy because of things like the automatic spell checker and built in thesauruses and dictionaries that come with our mobiles, PC's and Laptops.

I have had to use the automatic spell check twice already and I have only written a couple of paragraphs.

Some spelling errors are so common that they are searched for thousands of times each day.

This is MAJOR targeted traffic and most of the result that come up in the number one spot for many of these misspelled keywords are there by accident.

In order to capitalize on this targeted traffic right now, you've got know what the most common misspelling are first.

[Misspelled Keyword Generator](#) will allow you to enter any keyword or phrases (spelled correctly :-)) and then press the "Find Misspellings" Button.

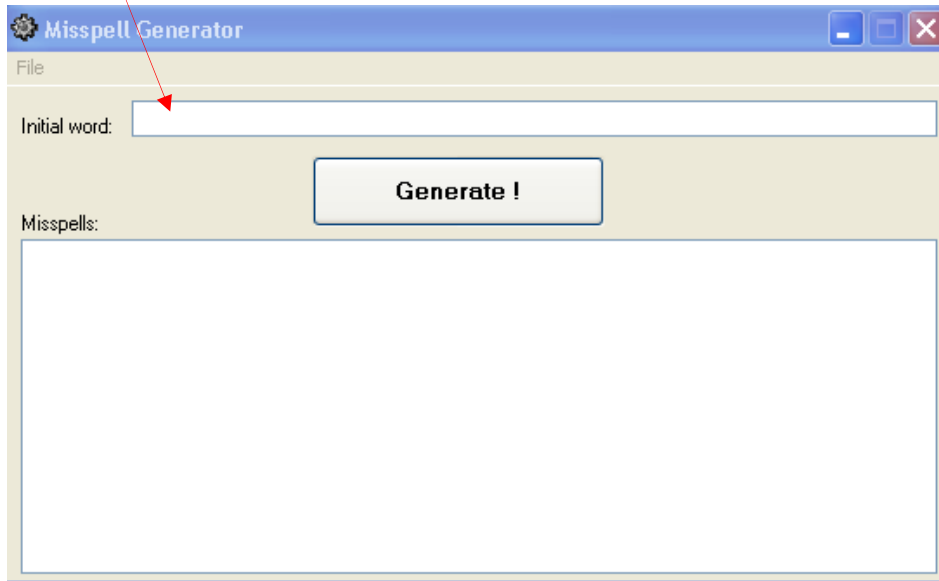

With [Misspelled Keyword Generator](#) you can dominate any niche you want to.

On the following page you will see an example of what could be achieved.

1. Launch the software that works from your desktop and enter the correct spelling.

I have chosen to use Beyonce for this demonstration and it has returned **418** misspells.

- You then take one of the misspellings and do a search using the free Google keyword tool to see if that misspelling is being typed into Google, I used **byonce** for this demo. Google let me know that last month that misspelt keyword was typed in **301,000** times which would make it over 9,000 times a day.

The screenshot shows the Google AdWords Keyword Tool interface. The search term 'byonce' is entered in the input field. The results table shows the following data:

Keywords	Advertiser Competition	Local Search Volume: December	Global Monthly Search Volume	Match Type
byonce knowles	Not enough data	Not enough data	1,600	Broad
byonce	9,900	9,900	301,000	Broad
byonce listen	Not enough data	Not enough data	3,600	Broad
byonce lyrics	Not enough data	Not enough data	2,400	Broad
byonce video	Not enough data	Not enough data	2,900	Broad
youtube byonce	Not enough data	Not enough data	1,000	Broad
byonce &	Not enough data	Not enough data	590	Broad
byonce at	Not enough data	Not enough data	Not enough data	Broad

Red arrows in the original image point from the text 'byonce' and '301,000' in the list above to the corresponding input field and search volume value in the screenshot.

3. So let's see that in action in Google, not much **competition** so out of those 301,000 searches being done last month how many do you think the top spot got. I'd say a **few thousand a day at least.**

The screenshot shows a Google search interface. The search bar contains the text 'byonce'. Below the search bar, there are radio buttons for 'the web' (selected) and 'pages from the UK'. To the right of the search bar is a 'Search' button and a link to 'Advanced Search'. Below the search bar, there is a horizontal line with the text 'Web Show options...' on the left and 'Results 1 - 10 of about 187,000 for byonce. (0.44 seconds)' on the right. Below this line, there are three search results. The first result is for 'Byonce (beyonce) music, information, images, pictures and information' with a link to 'www.byonce.com/'. The second result is for 'Beyonce Music Featuring | Am...Yours | The Official Beyonce Site' with a link to 'www.beyonceonline.com/'. The third result is for 'Download byonce lady gaga Files from General-Search' with a link to 'www.general-search.com/download/byonce-lady-gaga/'. There are also links for 'Image results for byonce' and 'Report images'.
